<b>Office Action Summary</b>	<b>Application No.</b> 10/524,755	<b>Applicant(s)</b> ZHAO ET AL.	
	<b>Examiner</b> Vivian Chen	<b>Art Unit</b> 1794	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

#### Status

## DETAILED ACTION

### *Response to Election/Restriction Requirement*

1. Applicant's election without traverse of Group I in the reply filed on 7/8/2008 is acknowledged.
2. Applicant's election without traverse of species (a)(ii) in the reply filed on 1/7/2009 is acknowledged.
3. Claims 8-12, 20-23 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 1/7/2009.

### *Claim Rejections - 35 USC § 112*

4. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

5. Claims 1-7, 13-19, 24-27, 29 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. The disclosure as originally filed is directed to very limited types of modified surfaces and devices (i.e., medical

devices and/or surfaces), very limited types of environments (i.e., liquids, blood, biological and/or medical), very limited types of particles (i.e., biological compounds and/or microorganisms), and very limited means of modifying a surface to achieve the recited matching of LW surface free energy (i.e., three specific coatings as set forth in claim 7). Furthermore, since there is no methodology or technique provided as to the calculation of LW surface free energy of various particles and various surfaces with respect to various environments, the disclosure as originally fails to enable of one ordinary skill in the art to make and/or use the invention as presently claimed. Furthermore, the disclosure as originally filed fails to enable one of ordinary skill in the art to adjust the LW surface free energy of various surfaces as to achieve the required match with the LW surface free energy of various particles. For example, many of the present claims encompass metallic particles and a surface in an oil refining apparatus or petroleum column, but the disclosure as originally filed fails to provide any information related to such particles, surfaces, environments, or the means of determining and matching the LW surface free energy of these components. Therefore, the disclosure as originally filed fails to enable one of ordinary skill in the art to to make or use the invention as presently claimed.
